PSYCHOLOGY DAY: CAREERS IN STEM!

October 18th, 2023
2 – 4 PM
N452

Keynote Speaker

Dr. Dan Mundy earned his Bachelor's degree in Computer Science from Boston College, completed his Medical Degree at Rutgers University, and then Psychiatric residency at Yale University. His fellowship in Forensic Psychiatry at NYU propelled him into the court system. In his most recent professional endeavor, Dr. Mundy has taken the reins of managing forensic psychiatry competency restoration services in several California county jails. Dr. Mundy is an ardent STEM enthusiast, who enjoys diving into projects that encompass coding, robotics, optics, 3D printing, music, welding, data analysis, chemistry, and (frequently) fire. He has merged his profession with his passion, delivering psychiatric presentations that integrate deep learning techniques within forensic psychiatry. In his talk, he will discuss his own journey, but also various career paths possible for students pursuing STEM in psychology.

Panelists

Fatma Kapusuz
Behavior Therapist

Ryan Walters
Senior Research Coordinator (NYU)

Mikayla Metviner
Emergency Medical Specialist

2:00 – 2:15 PM
Greetings & refreshments
